Geophysicist

Exploration Instruments (<http://www.expins.com>) is the premier geophysical instrument rental company in North America. EXI has an opening in Austin, Texas for a sharp individual to work in Technical Support and manage the company's inventory of rental equipment. This position relies heavily upon an attitude of superior service and attention to detail.

EXI is a small, well-known and respected company in its industry. We work very hard to earn and maintain the confidence and good-will of our customers. Our reputation is based on getting equipment to our clients on time and in great working condition.

The position entails testing and maintaining equipment and providing operational support to users. Over the course of time, he/she will become familiar with over 300 geophysical devices representing 100 different systems. The candidate will be in daily phone and email contact with geophysicists, hydrologists, geologists, archaeologists, and numerous other scientists worldwide.

Ideally, the candidate would have a degree in geophysics. However, a combination of degree in the earth sciences and/or electronics will be considered. This is a very exciting opportunity for someone who enjoys geophysical instrumentation and wants to work in an atmosphere of creativity and exploration.
